Supply Chain Solutions For
The Food & Beverage Industry

WAREHOUSING LOGISTICS & DISTRIBUTION

3PL

YOUR FULFILLMENT LOGISTIC PARTNER

As a 3PL (Third party Logistics Provider), we at Emdad Food Logistics believe in supplying our customers with strategies to convert their supply chain needs and requirements into a receptive and cost-effective model. This means we can become your fulfillment logistic partner by providing outsourced end-to-end supply chain solutions that are efficiently aligned and tailored to your specific requirements. We will enable you to fulfil all your logistic objectives with minimal effort by considering all logistic components, including transportation, custom clearance, and superior warehousing services. Our fully equipped facilities will support you in reaching new business milestones and constructing a robust supply chain to attain the mutual benefit of business scaling.

OVERVIEW

Having been in the logistics and food trading industry for decades, during which time we have accumulated an enormous wealth of experience, we at Emdad are proud of our ability to deliver consistent, responsive, and reliable services that satisfy our customers' needs. Knowing our customers, their business, and who their clients are enables us to target our services to benefit our clients within each of our 3 primary operating divisions:

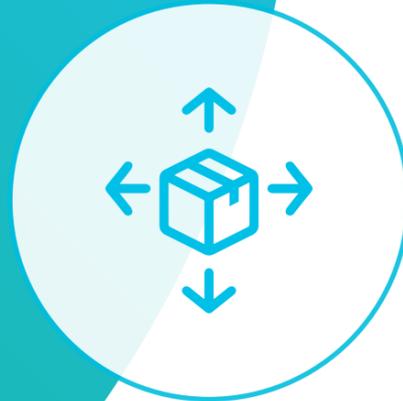

3PL

Transportation
Move it

3PL Warehousing
Store it

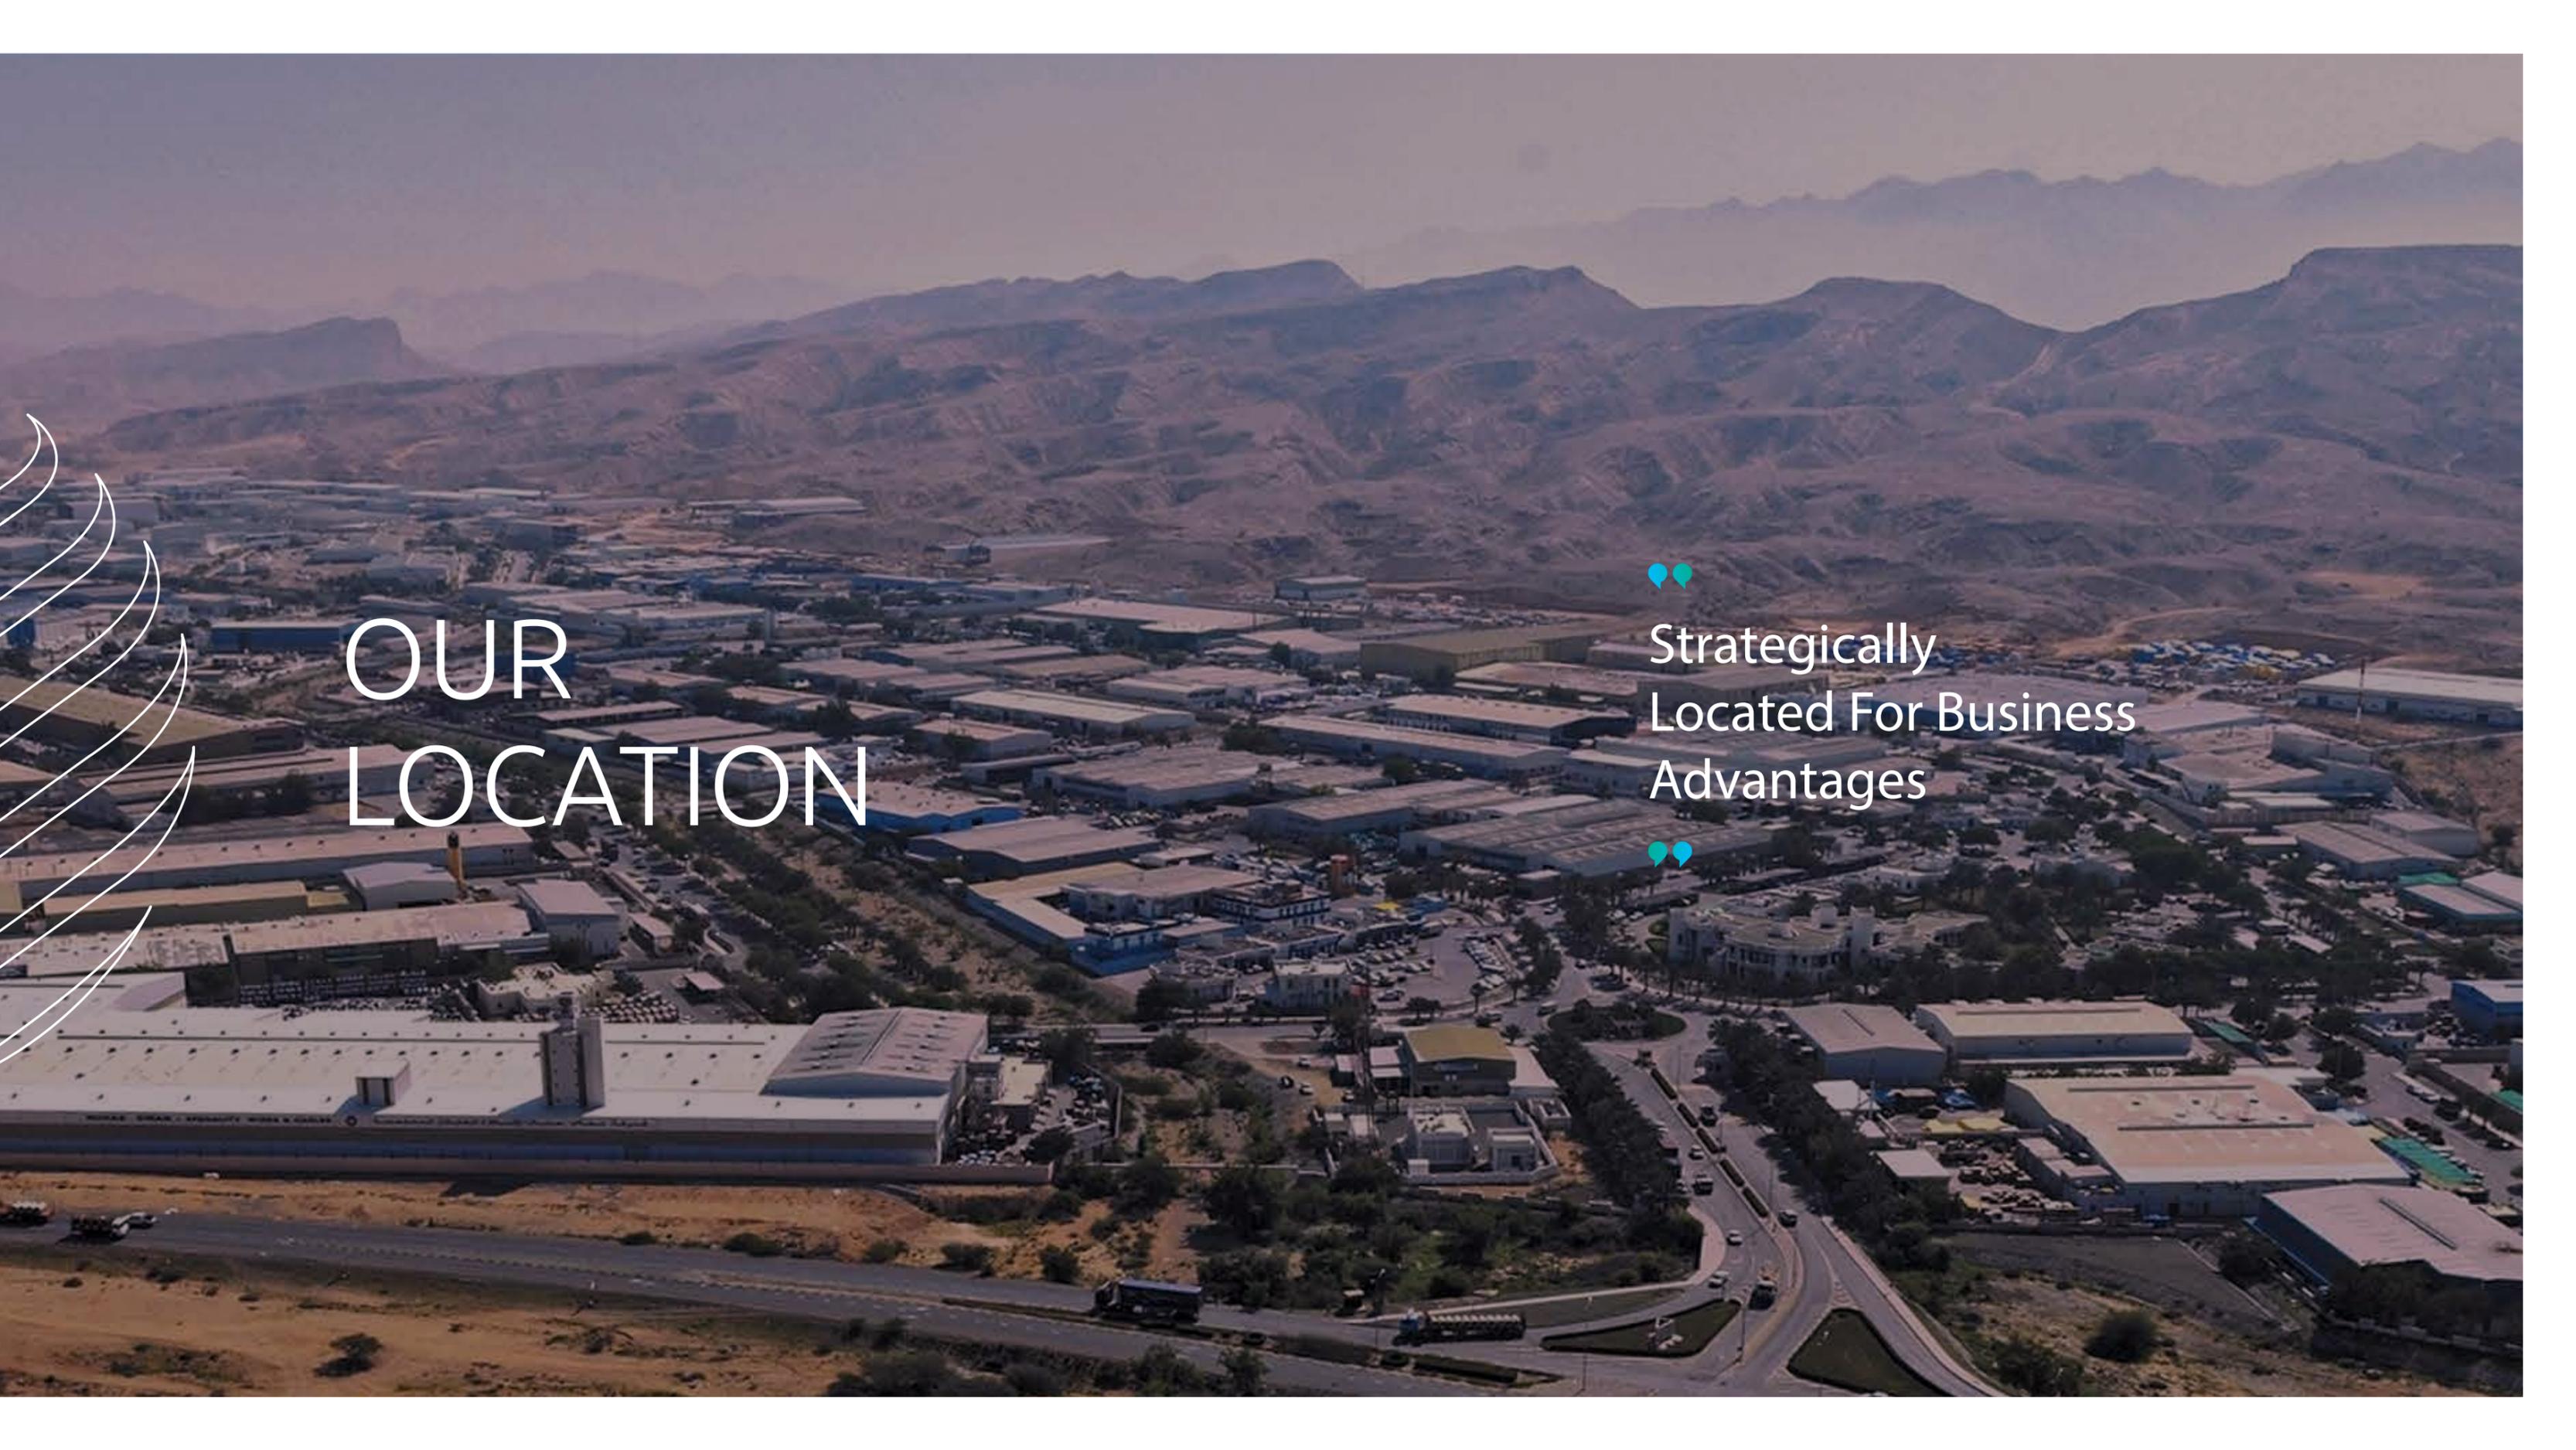

Packaging
Prepare it

A row of white commercial trucks, including box trucks and flatbed trucks, parked in front of a large industrial warehouse building. The scene is captured in a slightly desaturated, blue-tinted style. A large teal circle is overlaid on the left side of the image, containing the text 'OUR COMPANY CULTURE'.

OUR COMPANY CULTURE

Supported by our dedicated, professional team and our innovative logistics solutions, we aim to become your logistics and warehousing company of choice and thereby serve as an extension of your existing business projects, irrespective of their duration or size. Our core values are based around the delivery of trustworthy Warehousing, Distribution, and Logistics solutions to all types of business owners in accordance with their needs and requirements.

An aerial photograph of an industrial park or business district. The foreground shows a large, modern industrial building with a grey roof. The middle ground is filled with numerous other industrial buildings of various sizes, mostly with flat roofs. The background features a range of rugged, brown mountains under a clear sky. On the left side, there are white, stylized, curved lines that resemble a flame or a leaf.

OUR LOCATION

“
Strategically
Located For Business
Advantages
”

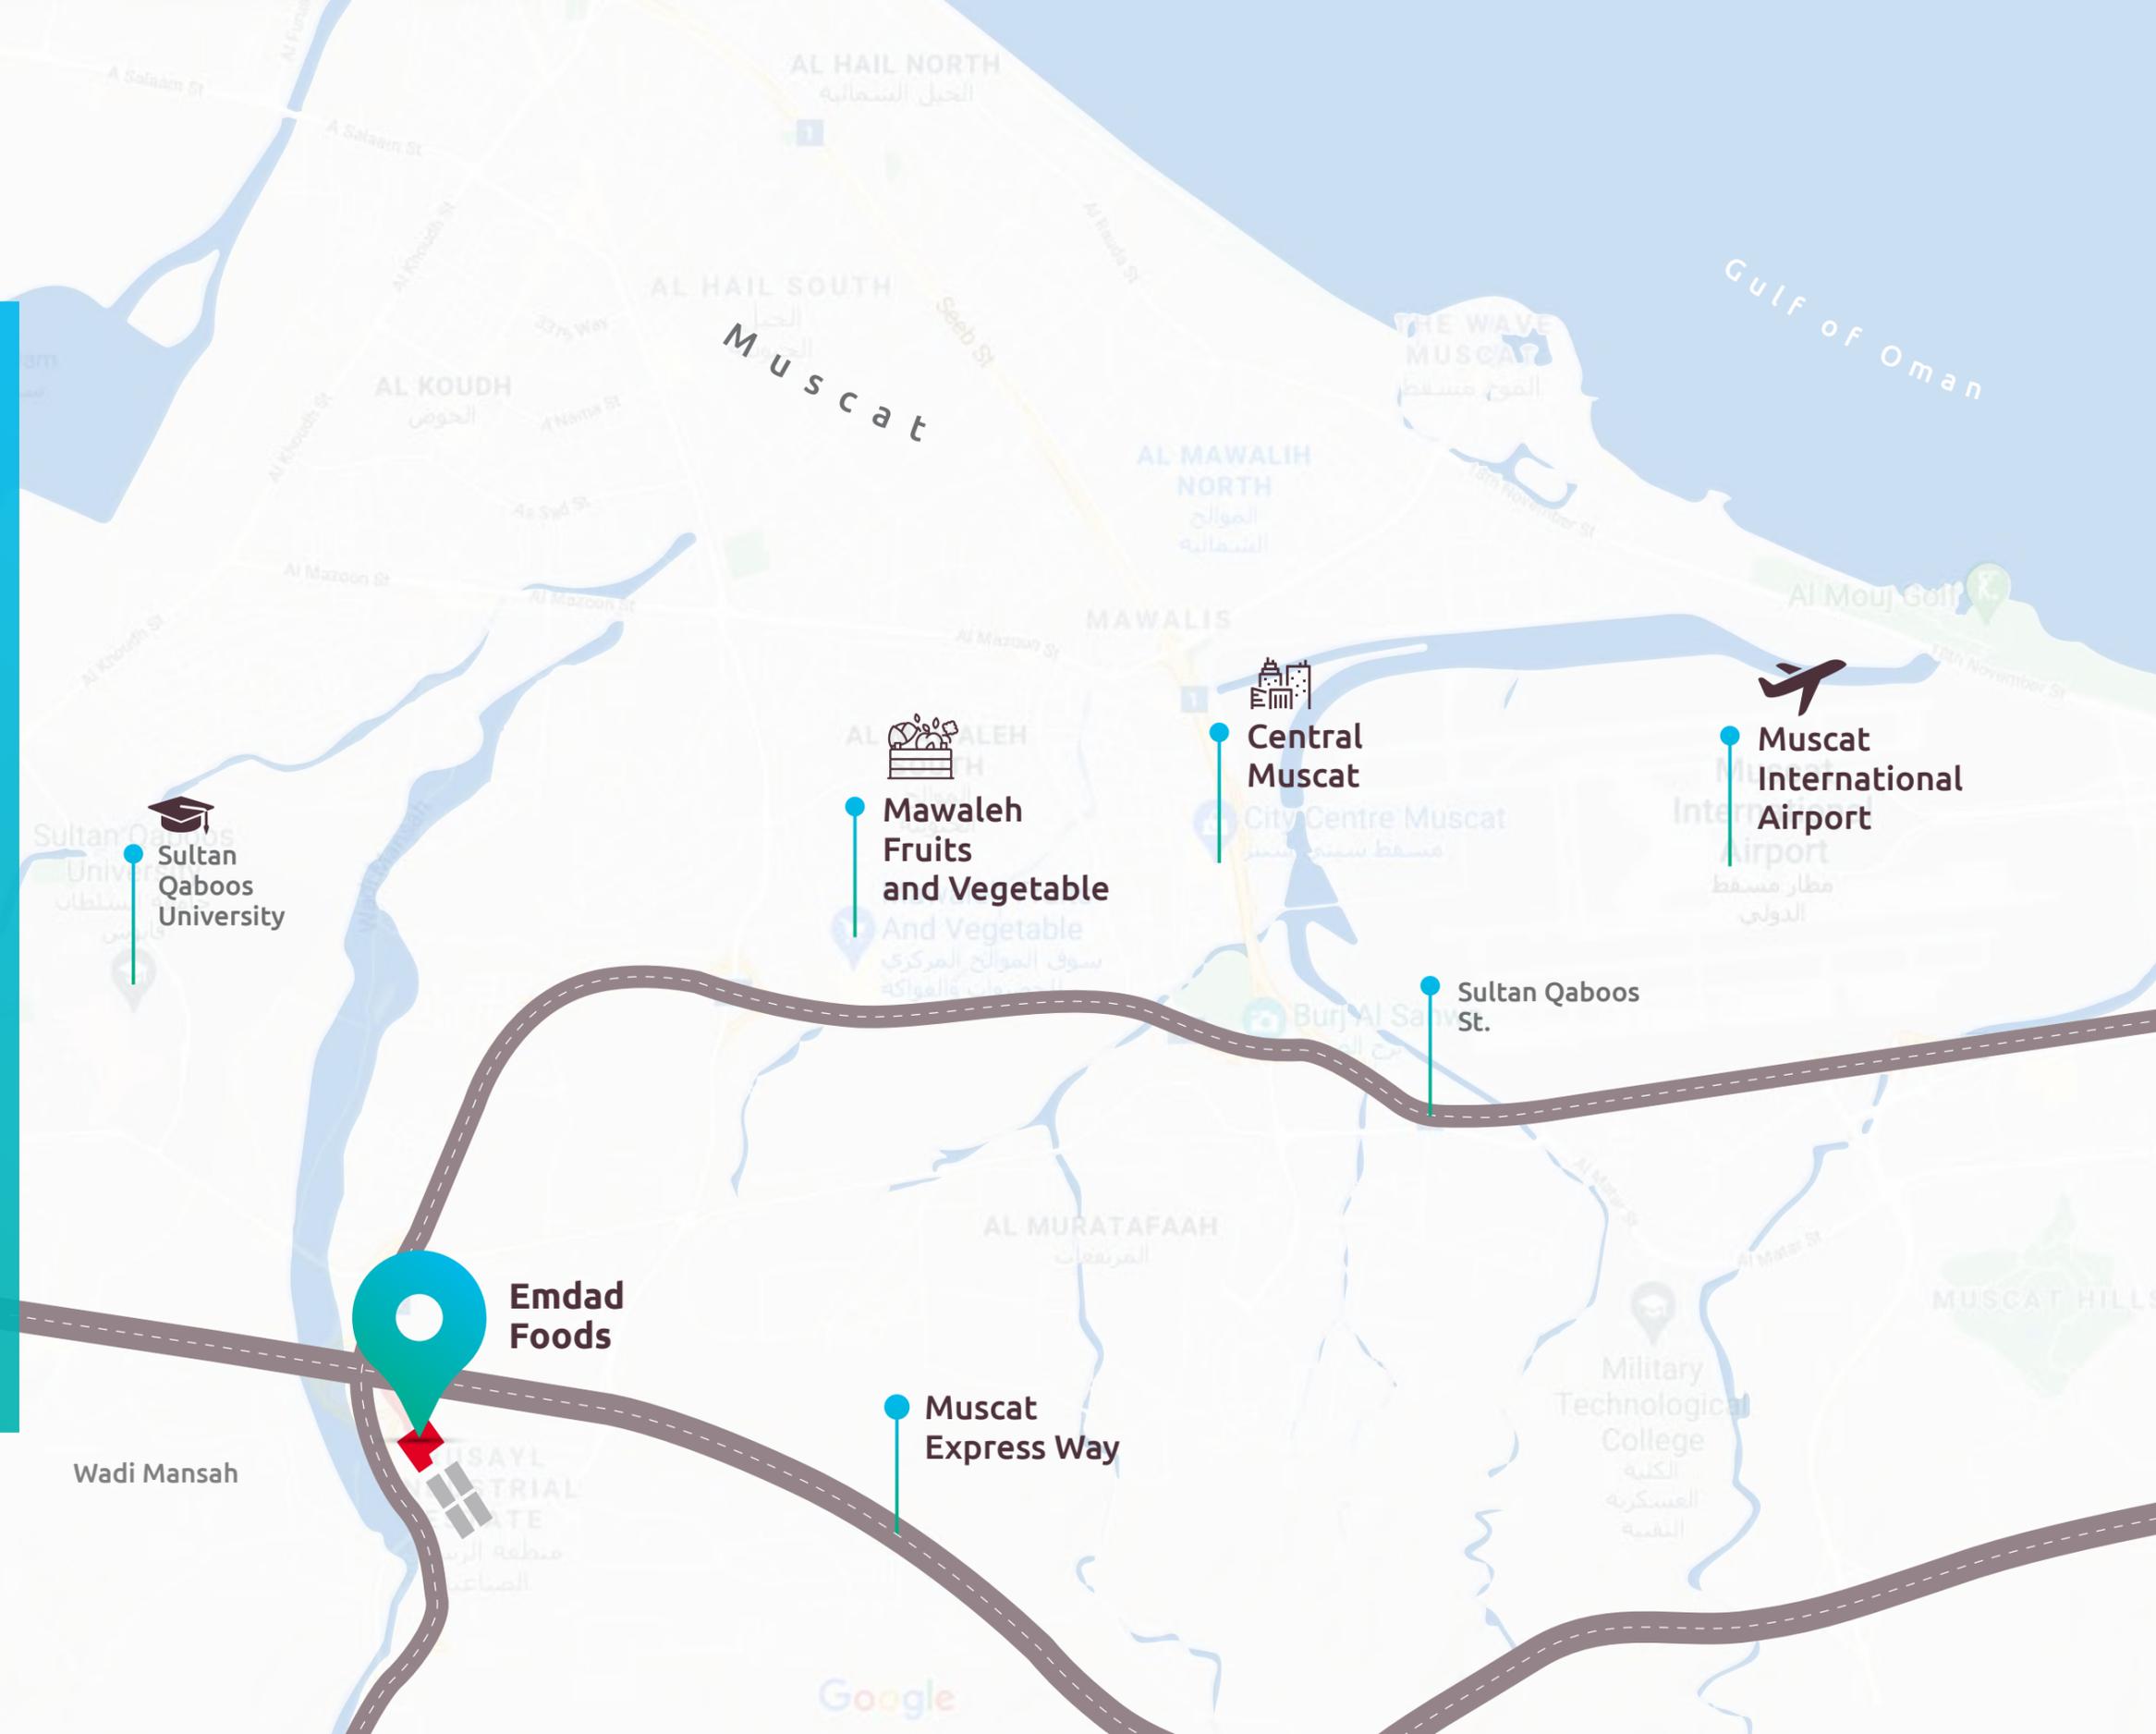

Muscat, AlRusayl Logistic Area

Our customers are our highest priority; therefore, it is essential to locate our logistic chain network strategically to ensure we meet their cross-border transport needs in a timely fashion and in line with their expectations and standards.

To that end, we have located our facilities in Oman immediately adjacent to Muscat's highway, major ports such as Muscat International Airport, and other primary road links.

Warehouses to Airport:
19 min (25km)

Warehouse to Port:
Sohar Port (23 km)

A photograph of a warehouse interior. On the right, a yellow truck with a red shipping container is parked. On the left, there are several stacks of cardboard boxes on wooden pallets. The warehouse has a high ceiling with a metal truss structure and industrial lighting. The overall scene is well-lit and organized.

A LOGISTIC LIFECYCLE

••
Dedicated.
Prominent.
Reliable

We offer a broad range of services at Emdad Logistic Center with customer satisfaction guaranteed. These services range from physical warehousing to logistics, stock management, and distribution. Through the support of a smooth and convenient logistic lifecycle, our overriding aim is to assist businesses so that they can expand and thrive in an extremely competitive business environment.

**FARMS
SUPPLIERS
MANUFACTURERS**

1

FREIGHT

We transport food goods to Importers and Exporters by sea, air, and land. Our international hands-on team of experts manage all global freight movements to ensure excellent quality performance and results.

2

CUSTOMS

Our strategic insights and wealth of experience mean we can exceed or avoid issues associated with governmental inspection on virtually every kind of food product as specified by local and international inspection standards.

4

Our strategic insights and wealth of experience mean we can exceed or even avoid issues associated with governmental inspection on virtually every kind of food product as specified by local and international inspection standards

STORE IT

Shouldn't Your Warehousing Partner
Be as Valuable as the Quality
of The Food You Supply ?

OUR
SMALL
IS BIG

In our role as a leading comprehensive 3PL company, we provide a vital connection between the field, the processor, the vendor, and ultimately the consumer.

Our **10,000** ton capacity Ammonia operating warehouses are separated into **24/7** operating small-sized rooms, each with varying levels of temperature and humidity. These serve to sustain and preserve the condition of each food product in accordance with its storage lifespan and the nature of the product.

.To continue operating, our dedicated warehousing and storage facilities are subjected to frequent and scrupulous assessments and adhere to all relevant sanitation and hygiene rules and procedures.

OUR STORAGE SAFETY COMES FIRST

One of our leading priorities and concerns has always been the storage of food. The length of time we have been in the food storage industry means we fully understand the importance of investing in technological systems to ensure we perform our job correctly.

Our advanced monitoring systems allow us to remotely monitor, tailor, and adjust the temperature of each our refrigerated storage units. We can therefore guarantee that all your food products are continually stored at constant, safe temperature ranges in accordance with the desired specifications and storage requirements for each product. Care is also taken to monitor all service doors within our facilities (when they are opened and closed) as well as the drop-off areas for trucks.

OUR
STORAGE
SAFETY
COMES
FIRST

The increasing availability of innovative technologies means we are able to invest in increasingly sophisticated and updated systems. This will ensure we become a market leader in the storage of safe cold food products and fulfil our clientele's safety and health needs and requirements in accordance with international standards and regulations.

WAREHOUSING TYPES

The facilities comprise dedicated temperature-controlled food-grading storage solutions, details of which are as follows:

Frozen Storage:

Our temperature-controlled storage facilities enable us to provide optimum freezer warehousing services comprising regulated freezer storage rooms for all kinds of food goods; these rooms are ideal for storing dairy products, meat, fish, or any other temperature-sensitive food products. We can maintain constant temperatures of 20- degrees and lower and these are monitored 24 hours a day to ensure optimal conditions are sustained. Our ideally situated warehousing spaces maximize the efficiency and reliability with which temperature-sensitive food goods can be stored and distributed.

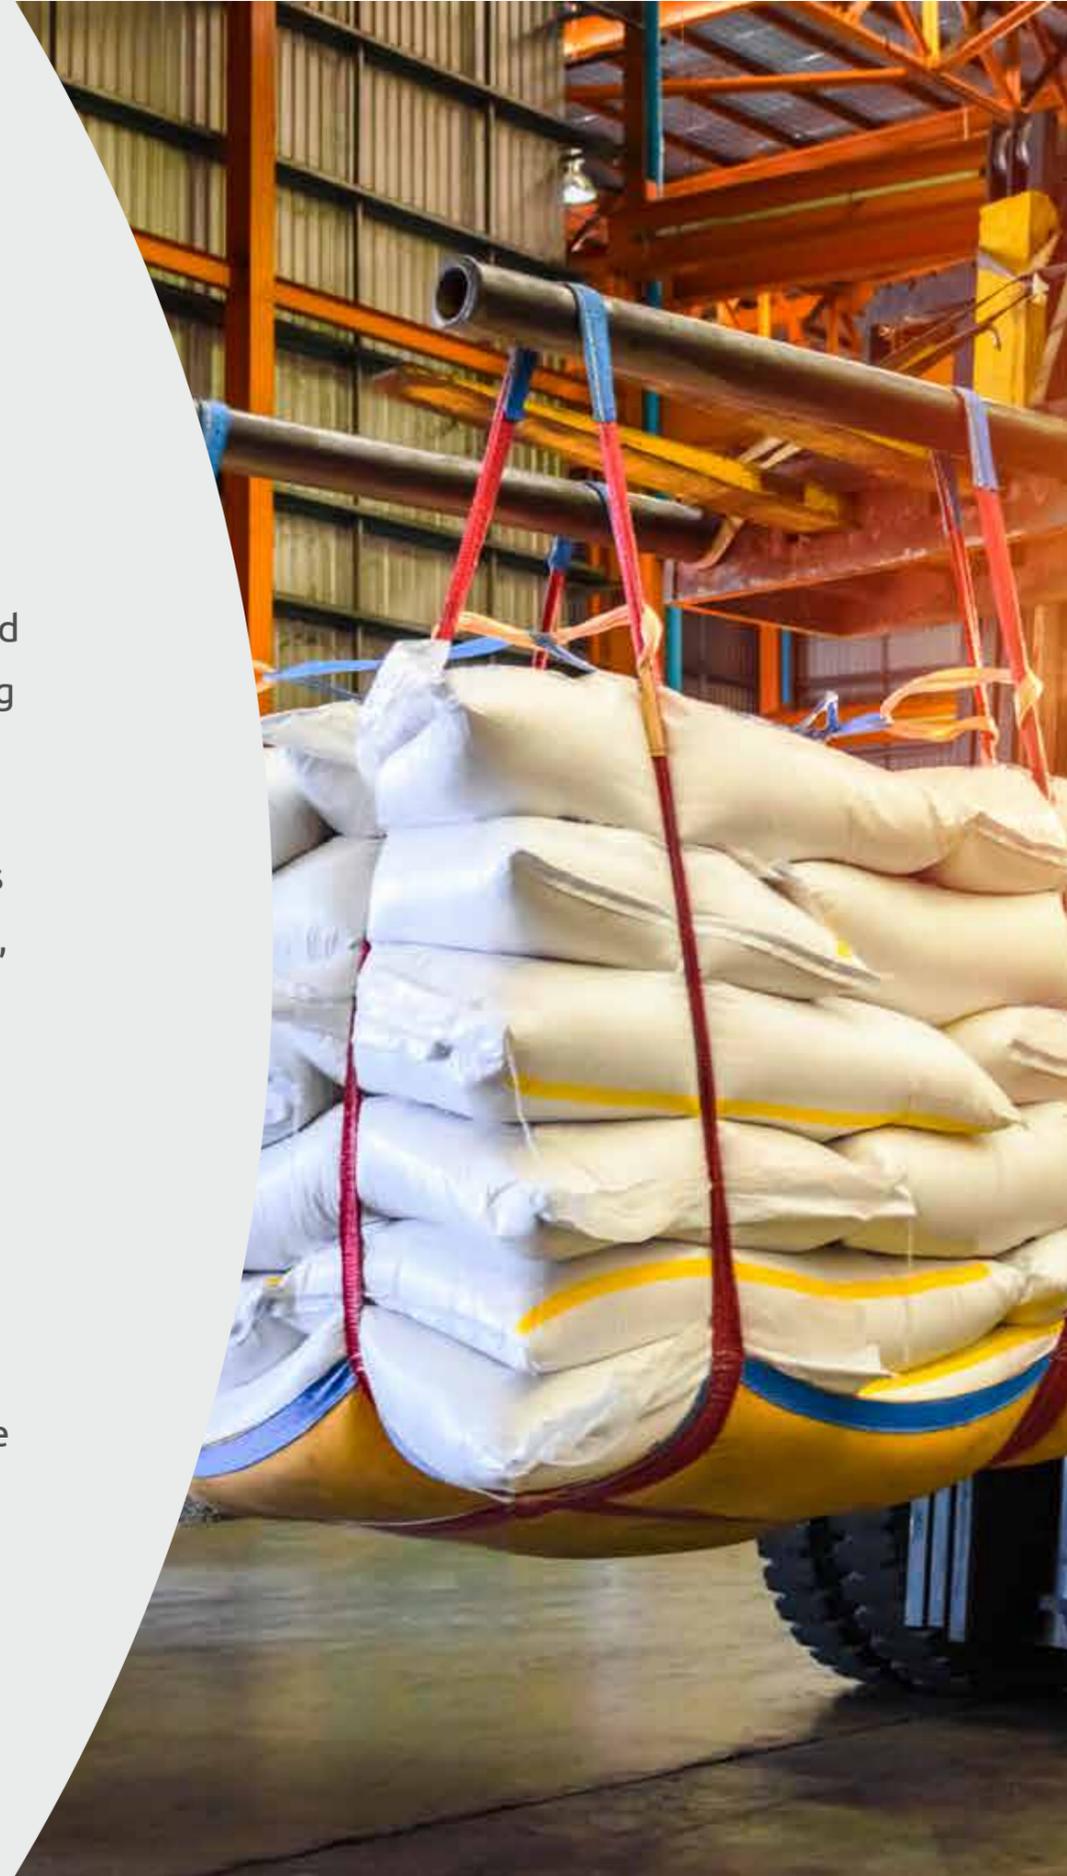

WAREHOUSING TYPES

The facilities comprise dedicated temperature-controlled food-grading storage solutions, details of which are as follows:

Dry Storage:

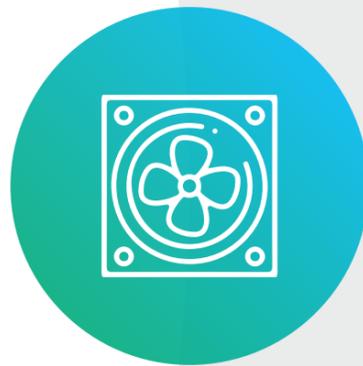

Our dry storage facilities are designed for any “dry” food product with a long shelf life that can be stored at room temperature in an environment free of moisture and humidity. Such foods include pasta, canned food, flour, tea, and any other type of food that can be stored at room temperature. The facilities comprise containers, warehouse spaces, and designated rooms with lighting levels and temperatures adjusted according to the type of product. To ensure the conditions remain constant, these are monitored 24 hours a day.

WAREHOUSING TYPES

The facilities comprise dedicated temperature-controlled food-grading storage solutions, details of which are as follows:

Chilled Storage:

The ideal cold or refrigerated storage spaces required by importers and exporters of temperature-sensitive food goods are provided by our temperature-controlled warehouse facilities. These spaces contain specialized cooling and refrigerating systems suitable for food products such as dairy, meat, beverages, and raw materials. The temperature in each storage room varies according to the type and quantity of food being stored. Importantly, our storage services are designed to be as cost-effective as possible without any reduction in quality.

Warehousing taken to the next level

1

Pre-cooling

By pre-cooling food products to their optimum temperature prior to being loaded onto containers, we guarantee their freshness and quality. Precooling measures are also applied to the containers to prevent any surface defrosting or freeze burns.

2

Blast freezing

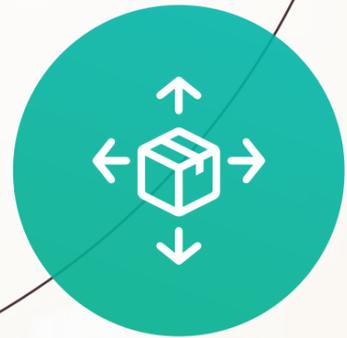

Among the various options provided by blast freezing storage solutions is the rapid cold shock technique. This is used to bring the temperature of products down extremely quickly prior to storing them at the room temperature required for long-lasting storage (depending on the product).

3

Banana ripening rooms

As part of our warehousing banana ripening service, we offer dedicated ripening rooms designed to allow the remote control of temperature, CO2 levels, humidity, and ventilation. The environments within these rooms are operated and monitored by our hands-on team of professionals whose years of knowledge and experience ensure we meet the ripening requirements of all our customers.

PREPARE IT

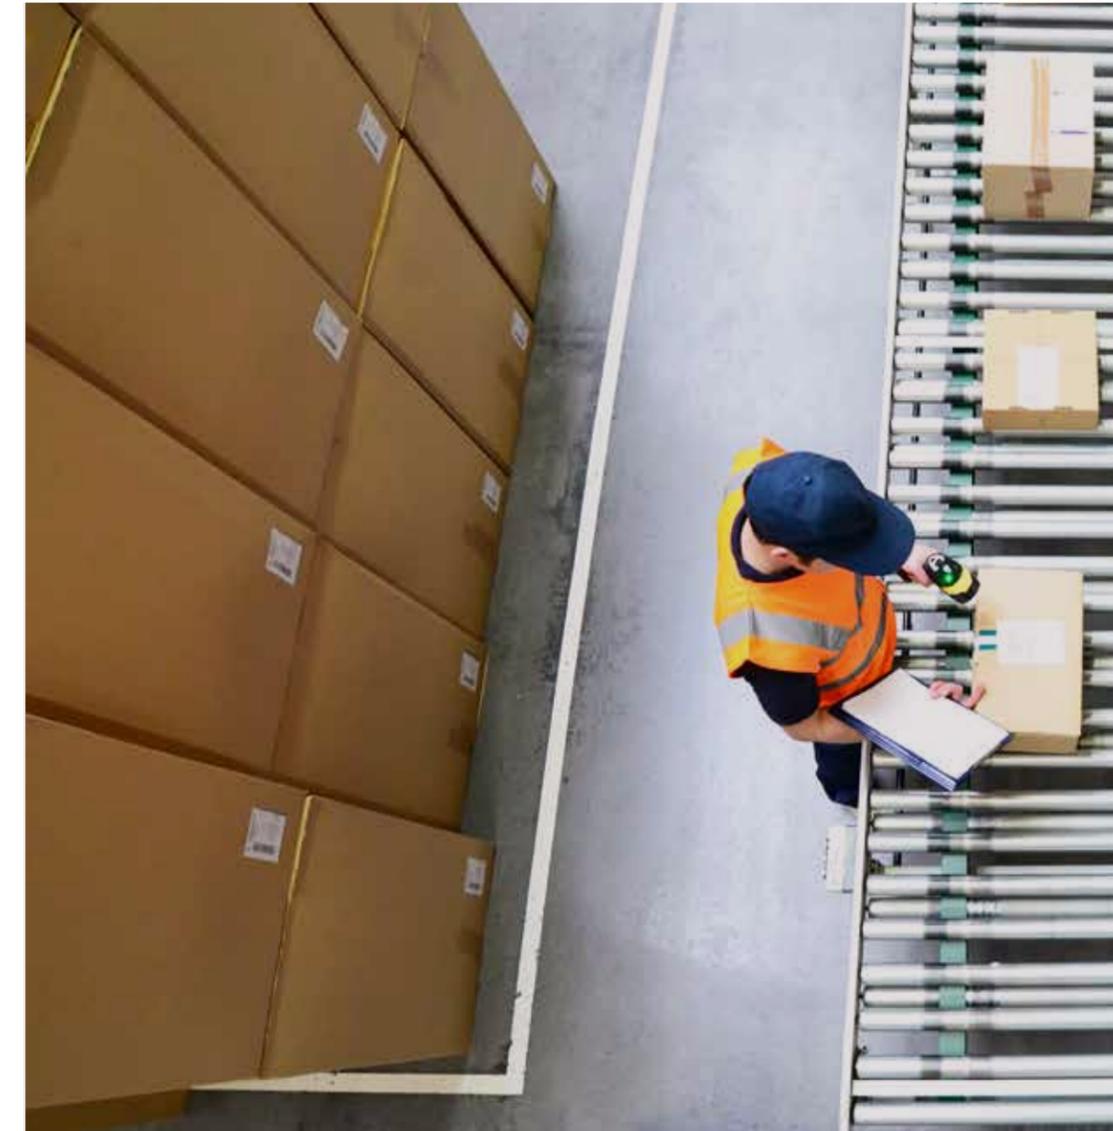

Comprehensive and integrated
Packaging and
Labelling experience

PACKAGING AND LABELLING SOLUTIONS

Irrespective of the food products being shipped and/or stored, or the conditions they are in, our customized and standardized product labeling, packing, and tagging solutions will fulfil the needs and requirements of all our clients by ensuring outstanding clarity of printing and labels in the following preparation categories:

- Product labeling
- Product barcoding
- Price tagging
- Retail consolidation (Multi-vendor)
- Foiling & netting
- Bagging, cartonizing
- Re-packing
- Meat cutting, meat boxing

WAREHOUSE PLANS

MASTER PLAN

Muscat Expressway

Muscat Expressway

OPENING 2021

The first phase of our facility will be completed in 2021. This will comprise a multi-functional logistic warehouse containing food storage units furnished with the most advanced cold storage systems.

MASTER PLAN

Muscat Expressway

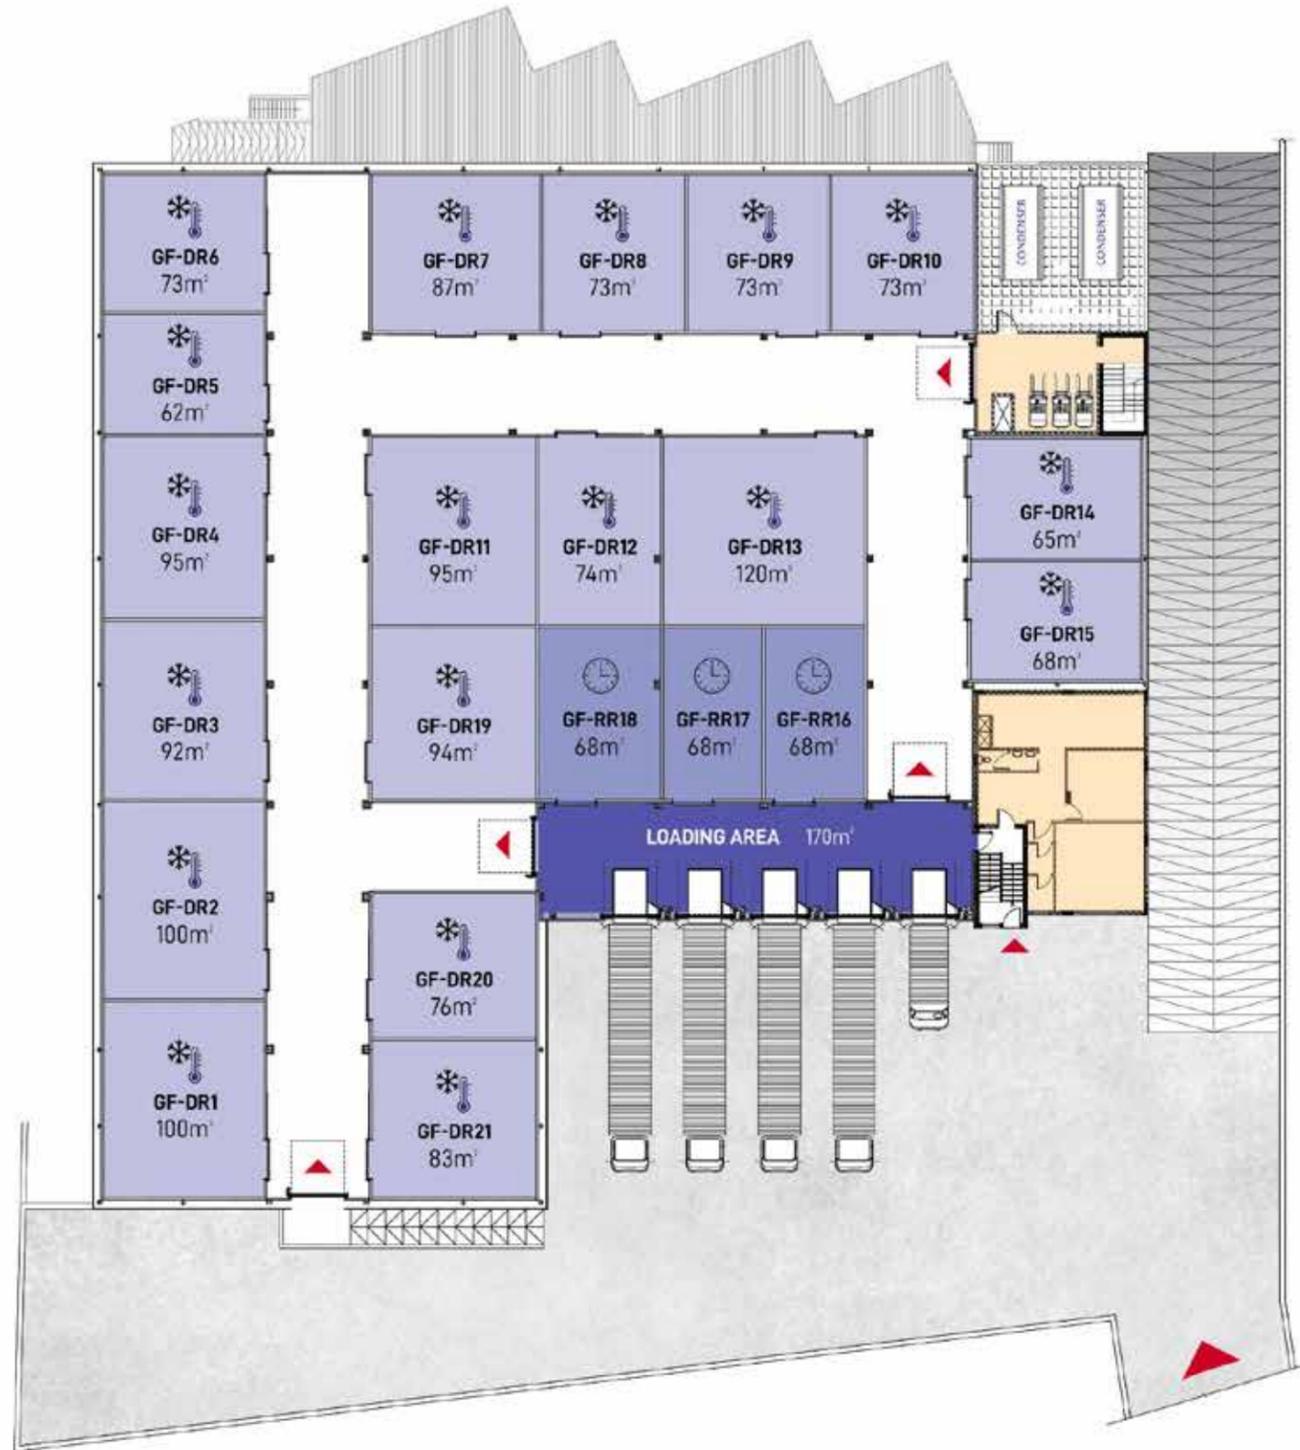

Muscat Expressway

PHASE 2

In the coming years, our goal is to provide a comprehensive logistic experience by enhancing our services further. This will be achieved through an expansion of our warehousing footprint and extending the functions and services we provide.
